

# POWERFUL A Great choice! 692 HP!

## ***When They Want Power, Pros Go With PaceSetter.***

The editors of JP Magazine wanted an affordable, durable header that would help their most powerful Jeep six-cylinder make horsepower, so they chose PaceSetter's #70-1129\*. It was an off-the-shelf header, with the only mod being to the Y-pipe to accept a turbo. The result? 692 horsepower with 777 ft-lbs of torque! Not too shabby for a Jeep!

*\*Painted finish. Optional high-gloss, silver ARMOR\*Coat ceramic available*
